SUMMARY

Fourth-year Information Systems student with hands-on experience building full-stack web applications using ReactJS, Next.js, TypeScript, Java, and Spring Boot. Skilled in developing responsive user interfaces, RESTful APIs, secure authentication, and database-driven systems. Eager to contribute as a Full-stack Developer Intern in a collaborative engineering team.

EDUCATION

Posts and Telecommunications Institute of Technology
Information Systems | GPA: 3.26/4.0

Ho Chi Minh City, Vietnam
September 2023 – June 2028 (Expected)

PROJECTS

Couture | [Live Demo](#) | [GitHub FE](#) | [GitHub BE](#)

April 2026 – May 2026

- **Technologies:** Next.js, TypeScript, Spring Boot, Spring Data JPA, Spring Security, JWT, MySQL, Docker, Tailwind CSS, Zustand, Axios.
- **Description:** Full-stack fashion e-commerce platform with AI-powered shopping assistance, online payments, secure authentication, product management, and an administration dashboard.
- **Key Contributions:**
 - * Developed responsive interfaces for product discovery, product details, wishlist, shopping cart, checkout, user profile, and order management using Next.js, TypeScript, and Tailwind CSS.
 - * Built RESTful APIs with Spring Boot and Spring Data JPA for products, categories, users, orders, appointments, authentication, and payments.
 - * Implemented secure authentication and authorization using Spring Security, JWT, Google OAuth2, Firebase, email verification, and password reset.
 - * Developed advanced product search, filtering, sorting, and pagination using JPA Specification and integrated the APIs with the frontend using Axios.
 - * Integrated SePay payment with QR code generation, webhook validation, transaction status handling, and automated email confirmation.
 - * Integrated Groq API to provide AI-powered product recommendations and quick shopping actions through a chatbot interface.
 - * Implemented Cloudinary image uploads, product administration, appointment booking, newsletter subscription, and scheduled token cleanup.

EventHub | [Live Demo](#) | [GitHub FE & BE](#)

April 2026 – June 2026

- **Role:** Frontend Team Lead in a team of four developers, responsible for frontend architecture, reusable component development, task coordination, and backend API integration.
- **Technologies:** ReactJS, TypeScript, Tailwind CSS, shadcn/ui, Zustand, Axios.
- **Description:** Event management platform that allows users to discover, create, manage, book, and interact with events through a responsive and user-friendly web interface.
- **Key Contributions:**
 - * Led frontend development by defining the application structure, coding conventions, reusable components, and consistent UI patterns.
 - * Built responsive interfaces for event discovery, event details, booking, ticket management, user profiles, blogs, and administration features.
 - * Developed the event booking flow with seat selection, discount code application, order summary, and payment confirmation.
 - * Integrated backend APIs using Axios with centralized request handling, loading states, error management, and data synchronization.
 - * Implemented global state management with Zustand for authentication, user information, booking data, and application-level interactions.
 - * Integrated camera-based QR code scanning, client-side PDF ticket generation, and an AI chatbot for answering event-related questions.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Java, SQL

Frontend: ReactJS, Next.js, HTML5, CSS3, Tailwind CSS, shadcn/ui, Zustand, Axios

Backend: Spring Boot, Spring Data JPA, Spring Security, JWT, RESTful APIs

Databases: MySQL, SQL Server

Tools & Platforms: Git, GitHub, Docker, Maven, Postman, Cloudinary, Firebase, Vercel
