EDUCATION

Posts and Telecommunications Institute of Technology

Bachelor of Software Engineering | GPA: 3.26/4.0

Ho Chi Minh City, Vietnam

September 2023 – June 2028 (Expected)

PROJECTS

Couture | fashion-opal-nu.vercel.app | [GitHub FE](#) | [GitHub BE](#)

April 2026 – May 2026

- **Technologies:** Next.js, TypeScript, Spring Boot, Spring Data JPA, Spring Security, JWT, MySQL, Docker, Tailwind CSS, Zustand.
- **Description:** Full-stack fashion e-commerce platform integrated with AI-powered shopping assistance, online payment automation, authentication systems, and a complete admin management dashboard.
- **Key Implementation:**
 - * Built AI fashion assistant using Groq API with quick-action suggestions (product discovery, appointment booking, tailoring services) that provides personalized outfit recommendations directly in conversations.
 - * Developed SePay payment workflow with QR generation, webhook validation, and automated email confirmation after successful transactions.
 - * Implemented secure authentication using JWT Access/Refresh Tokens, Google OAuth2, Firebase integration, and scheduled token cleanup.
 - * Created advanced product filtering using JPA Specification with dynamic queries, sorting, pagination, and multi-condition search.
 - * Developed product management including variants, collections, multiple image uploads via Cloudinary, and admin dashboard analytics.
 - * Developed the Atelier booking feature with automated email confirmation upon successful appointment scheduling.
 - * Built a newsletter subscription system to notify customers about new collection releases.

EventHub | beetic.vercel.app | [GitHub FE & BE](#)

April 2026 – June 2026

- **Role:** Frontend Leader in a team of 4 developers, responsible for frontend architecture, UI development, and frontend integration with backend services.
- **Technologies:** ReactJS, TypeScript, Tailwind CSS, shadcn/ui, Zustand, Axios.
- **Description:** Event management platform that allows users to discover, create, manage, and interact with events through a modern, responsive, and user-friendly interface.
- **Key Implementation:**
 - * Led frontend development by designing application structure, reusable components, and maintaining consistent UI patterns across the platform.
 - * Built responsive user interfaces using ReactJS, Tailwind CSS, and shadcn/ui component library, integrated with an AI chatbot for answering user questions about events.
 - * Developed the event booking flow with seat selection, discount code application, and camera-based QR code scanning for payment confirmation.
 - * Implemented client-side PDF ticket generation for instant download after successful payment.
 - * Implemented a scheduled job system that automatically generates new blog posts via AI at set intervals.
 - * Implemented global state management with Zustand for user data, authentication, and application-level interactions.
 - * Integrated backend APIs using Axios with optimized handling, error management, and data synchronization between frontend and backend.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Java, SQL

Frameworks & Libraries: ReactJS, Next.js, Spring Boot, Spring Data JPA, Spring Security, Tailwind CSS, shadcn/ui, Zustand

Databases & Tools: MySQL, SQL Server, Docker, Git, Maven, Axios
